

# Digital Printing Paper List

We charge per centimetre from a 61cm roll, so all files must be prepared with a maximum width of 60cm.

For digital printing enquiries, please send your files at minimum 300dpi to [studio@edinburghprintmakers.co.uk](mailto:studio@edinburghprintmakers.co.uk) and fill out our online form [via this link](#).

## Preparing colour images

Colour files should be in RGB Adobe 1998 profile. Save a scaled and flattened version of the file (without layers), preferable as a .TIFF or Photoshop file.

Multiple images (including multiples of the same image) should be sent to us laid out in one long file at scale, maximum 60cm wide. If you prepare your files before sending them to us, we can process and print them more quickly.

If you would like advice for preparing your artwork, it is possible to book time for file set up and assistance with our Studio Team.

Prices start at £10.
